

GMP APC anti-human CD14 Antibody

Catalog# / Size 260056 / 100 tests

 Clone
 M5E2

 Workshop
 III 329

 Other Names
 LPS receptor

 Isotype
 Mouse IgG2a, κ

Description CD14 is a 53-55 kD glycosylphosphatidylinositol (GPI)-linked membrane glycoprotein also

known as LPS receptor. CD14 is expressed at high levels on monocytes and macrophages, and at lower levels on granulocytes. Some dendritic cell populations such as interfollicular dendritic cells, reticular dendritic cells, and Langerhans cells have also been reported to express CD14. As a high-affinity receptor for LPS, CD14 is involved in the clearance of gramnegative pathogens, and in the upregulation of adhesion molecules and expression of

cytokines in monocytes and neutrophils.

Product Details

Reactivity Human

Antibody Type Monoclonal

Host Species Mouse

Immunogen Full-length human CD14 protein

Formulation Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide, 0.2% (w/v) BSA (origin

USA) and a stabilizer.

Pre paration The antibody was purified by affinity chromatography and conjugated with APC under optimal

conditions.

Concentration 200 µg/mL

Storage & Handling The antibody solution should be stored undiluted between 2°C and 8°C, and protected from

prolonged exposure to light. Do not freeze.

Application FC - Quality tested

Recommended Usage Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric

<u>analysis</u>. For flow cytometric staining, the suggested use of this reagent is 5 μ L per million cells in 100 μ L staining volume or 5 μ L per 100 μ L of whole blood. It is recommended that the reagent be

titrated for optimal performance for each application.

Excitation Laser Red Laser (633 nm)

Application Notes The M5E2 antibody inhibits monocyte activation and cytokine production induced by LPS.

Additional reported applications (for the relevant formats) include: immunohistochemical staining of acetone-fixed frozen sections, blocking of LPS stimulation⁴, and immunofluorescence microscopy⁵. Clone M5E2 is not recommended for immunohistochemical staining of formalin-fixed paraffinembedded sections. The Ultra-LEAF™ purified antibody (Endotoxin < 0.01 EU/µg, Azide-Free, 0.2

µm filtered) is recommended for functional assays (Cat. No. 301861 and 301862).

Disclaimer

GMP RUO Flow Cytometry Antibodies. BioLegend GMP RUO fluorophore conjugated antibodies are manufactured in a dedicated GMP facility and compliant with ISO 13485:2016. For research use only. Not for use in diagnostic or therapeutic procedures. Our processes include:

- Batch-to-batch consistency
- Material traceability
- · Documented procedures
- · Documented employee training
- Equipment maintenance and monitoring records
- · Lot-specific certificates of analysis
- Quality audits per ISO 13485:2016
- QA review of released products

Antigen Details

Structure GPI-linked membrane glycoprotein, 53-55 kD

Distribution Monocytes, macrophages, granulocytes (low)

Function LPS receptor, clearance of Gram-negative pathogens

Ligand/Receptor LPS

Cell Type Granulocytes, Macrophages, Monocytes, Neutrophils

Biology Area Cell Biology, Immunology, Innate Immunity, Neuroinflammation, Neuroscience

Molecular Family CD Molecules
