

GMP FITC anti-human CD16 Antibody

| | |
|------------------------|---|
| Catalog# / Size | 260168 / 100 tests |
| Clone | 3G8 |
| Workshop | V NK80 |
| Other Names | FcγRIII, Fc gamma receptor, Fc gamma receptor 3 |
| Isotype | Mouse IgG1, κ |
| Description | CD16 is known as low affinity IgG receptor III (FcγRIII). It is expressed as two distinct forms (CD16a and CD16b). CD16a (FcγRIIIA) is a 50-65 kD polypeptide-anchored transmembrane protein. It is expressed on the surface of NK cells, activated monocytes, macrophages, and placental trophoblasts in humans. CD16b (FcγRIIIB) is a 48 kD glycosylphosphatidylinositol (GPI)-anchored protein. Its extracellular domain is over 95% homologous to that of CD16a, and it is expressed specifically on neutrophils. CD16 binds aggregated IgG or IgG-antigen complex which functions in NK cell activation, phagocytosis, and antibody-dependent cell-mediated cytotoxicity (ADCC). |

Product Details

| | |
|---|--|
| Reactivity | Human |
| Antibody Type | Monoclonal |
| Host Species | Mouse |
| Immunogen | Human PMN cells |
| Formulation | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA). |
| Preparation | The antibody was purified by affinity chromatography and conjugated with FITC under optimal conditions. |
| Concentration | 400 µg/mL |
| Storage & Handling | The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze. |
| Application | FC - Quality tested |
| Recommended Usage | Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis . For flow cytometric staining, the suggested use of this reagent is 5 µL per million cells in 100 µL staining volume or 5 µL per 100 µL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application. |
| Excitation Laser | Blue Laser (488 nm) |
| Application Notes | <p>The 3G8 antibody clone blocks neutrophil phagocytosis and stimulates NK cell proliferation. It has been reported that this clone interacts with the FcγRIIa and FcγRIIb receptors causing neutrophil activation and aggregation¹⁸. Due to this phenomenon staining in whole blood may cause a reduction in the number of granulocytes or alter their scatter profile.</p> <p>Additional reported applications (for the relevant formats) include: immunohistochemical staining of acetone-fixed frozen tissue sections⁶, immunoprecipitation³, stimulation of NK cell proliferation⁴, blocking of phagocytosis⁵, and blocking of immunoglobulin binding to FcγRIII^{7,8}. The Ultra-LEAF™ purified antibody (Endotoxin < 0.01 EU/µg, Azide-Free, 0.2 µm filtered) is recommended for functional assays (Cat. No. 302049, 302050, 302057, 302058).</p> |

Disclaimer

GMP RUO Flow Cytometry Antibodies. BioLegend GMP RUO fluorophore conjugated antibodies are manufactured in a dedicated GMP facility and compliant with ISO 13485:2016. For research use only. Not for use in diagnostic or therapeutic procedures. Our processes include:

- Batch-to-batch consistency
- Material traceability
- Documented procedures
- Documented employee training
- Equipment maintenance and monitoring records
- Lot-specific certificates of analysis
- Quality audits per ISO 13485:2016
- QA review of released products

Antigen Details

| | |
|---------------------------|---|
| Structure | Ig superfamily, transmembrane form (50-65 kD) or GPI-linked form (48 kD) |
| Distribution | NK cells, activated monocytes, macrophages, neutrophils |
| Function | Low affinity IgG Fc receptor, phagocytosis, ADCC |
| Ligand/Receptor | Aggregated IgG, IgG-antigen complex |
| Cell Type | Dendritic cells, Macrophages, Monocytes, Neutrophils, NK cells |
| Biology Area | Immunology, Innate Immunity |
| Molecular Family | CD Molecules, Fc Receptors |
| Antigen References | <ol style="list-style-type: none"> 1. Fleit H, <i>et al.</i> 1982. <i>P. Natl. Acad. Sci. USA</i> 79:3275. 2. Stroncek D, <i>et al.</i> 1991. <i>Blood</i> 77:1572. 3. Wirthmueller U, <i>et al.</i> 1992. <i>J. Exp. Med.</i> 175:1381. |
