

## Brilliant Violet 421™ anti-mouse Ly-6C Antibody

|                          |  |
|--------------------------|--|
| <b>Catalog# / Size</b>   | 128031 / 125 µL<br>128032 / 500 µL   |
| <b>Clone</b>             | HK1.4  |
| <b>Regulatory Status</b> | RUO  |
| <b>Other Names</b>       | Lymphocyte antigen 6 complex, locus C  |
| <b>Isotype</b>           | Rat IgG2c, κ   |
| <b>Description</b>       | Most hematopoietic cells express one or more members of Ly-6 family. The expression of Ly-6 varies with development stage and activation. Ly-6C is a 14-17 kD GPI-linked surface protein expressed on mouse monocyte/macrophage cells, endothelial cells, neutrophils, and some T cell subsets. Ly-6C is reported to be an indicator of memory CD8 <sup>+</sup> T cells. |

### Product Details

---

|                               |  |
|-------------------------------|--|
| <b>Verified Reactivity</b>    | Mouse  |
| <b>Antibody Type</b>          | Monoclonal   |
| <b>Host Species</b>           | Rat  |
| <b>Immunogen</b>              | L3 cloned CTL cells  |
| <b>Formulation</b>            | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and BSA (origin USA).   |
| <b>Preparation</b>            | The antibody was purified by affinity chromatography and conjugated with Brilliant Violet 421™ under optimal conditions.   |
| <b>Concentration</b>          | Lot-specific (to obtain lot-specific concentration, please enter the lot number in our <a href="#">Concentration and Expiration Lookup</a> or <a href="#">Certificate of Analysis</a> online tools.)   |
| <b>Storage &amp; Handling</b> | The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. <b>Do not freeze.</b>  |
| <b>Application</b>            | <a href="#">FC - Quality tested</a>  |
| <b>Recommended Usage</b>      | Each lot of this antibody is quality control tested by <a href="#">immunofluorescent staining with flow cytometric analysis</a> . For flow cytometric staining, the suggested use of this reagent is 5 µl per million cells in 100 µl staining volume or 5 µl per 100 µl of whole blood. It is recommended that the reagent be titrated for optimal performance for each application. Brilliant Violet 421™ excites at 405 nm and emits at 421 nm. The standard bandpass filter 450/50 nm is recommended for detection. Brilliant Violet 421™ is a trademark of Sirigen Group Ltd. |

The purchase of this product conveys to the buyer a non-transferable right to use the purchased product for research purposes only. This product may not be resold or incorporated in any manner into another product for resale. Any use for therapeutics or diagnostics is strictly prohibited. This product is covered by U.S. Patent(s), pending patent applications and foreign equivalents.

|                          |  |
|--------------------------|--|
| <b>Excitation Laser</b>  | Violet Laser (405 nm)  |
| <b>Application Notes</b> | Clone HK1.4 does not block the binding of clone RB6-8C5 <sup>8</sup> .<br><br>Additional reported applications (for relevant formats of this clone) include: <i>in vitro</i> activation of T cells <sup>1-3</sup> and immunohistochemistry of frozen sections <sup>4</sup> . |

## Antigen Details

---

|                           |   |
|---------------------------|---|
| <b>Structure</b>          | 14-17 kD protein (134 amino acids), member of the Ly-6 family of GPI linked protein. Ly6 family members share structure homology throughout a distinctive cystein rich protein domain that incorporates O-linked carbohydrates. |
| <b>Distribution</b>       | Ly-6C is expressed primarily on bone marrow myeloid populations, monocytes/macrophages, neutrophils, endothelial cells, and some T cell subsets. Ly-6C is also a marker of memory CD8 <sup>+</sup> T cells.                     |
| <b>Cell Type</b>          | Endothelial cells, Macrophages, Monocytes, Neutrophils, T cells   |
| <b>Biology Area</b>       | Immunology  |
| <b>Molecular Family</b>   | CD Molecules  |

## Product Data

---

C57BL/6 mouse bone marrow cells were stained with Ly-6C (clone HK1.4) Brilliant Violet 421™ (filled histogram). Open histogram represents non-stained cells. Data shown was gated on the myeloid population.
