

Biotin anti-mouse CD226 (DNAM-1) Antibody

Catalog# / Size	128820 / 100 µg
Clone	10E5
Regulatory Status	RUO
Other Names	DNAM-1, PTA1 (platelet and T cell activation antigen 1), TLISA1, LFA-1 associated Molecule PTA-1
Isotype	Rat IgG2b, κ
Description	CD226 (DNAM-1) is constitutively expressed on native CD8 ⁺ cells and on CD4 ⁺ T cells, macrophages and NK cells. This antibody (10E5) was reported to bind about 40% of inactivated CD4 ⁺ cells and binds only to differentiated Th1 cells, but not to Th2 or Th0 cells. It is also reported to suppress antigen-specific T cell expansion and EAE (experimental allergic encephalitis) mediated by Th1 cells.

Product Details

Verified Reactivity	Mouse
Antibody Type	Monoclonal
Host Species	Rat
Immunogen	Th1 polarized T cell clones
Formulation	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Preparation	The antibody was purified by affinity chromatography and conjugated with biotin under optimal conditions.
Concentration	0.5 mg/ml
Storage & Handling	The antibody solution should be stored undiluted between 2°C and 8°C. Do not freeze.
Application	FC - Quality tested
Recommended Usage	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis . For flow cytometric staining, the suggested use of this reagent is ≤0.125 µg per million cells in 100 µl volume. It is recommended that the reagent be titrated for optimal performance for each application.

RRID	AB_2632824 (BioLegend Cat. No. 128820)

Antigen Details

Structure	65 kd glycoprotein of a member of Ig-superfamily containing 2 immunoglobulin-like domains.
Distribution	Expressed on majority of CD4 ⁺ and CD8 ⁺ T cells, NK cells, monocytes/macrophages and a subset of B cells and thymocytes. Reported to be specifically expressed on the surface of Th1 cells, but downregulated in Th2 cells.
Function	Mediates cellular adhesion, involved in LFA-1 costimulatory signal for T cell differentiation and proliferation
Ligand/Receptor	CD112 and CD155
Cell Type	B cells, Macrophages, Monocytes, NK cells, T cells, Th1

Biology Area	Immunology
Molecular Family	Adhesion Molecules, CD Molecules
Antigen References	1. Tahara Hanaoka S, <i>et al.</i> 2006. <i>Blood</i> 107:1491 2. Shibuya K, <i>et al.</i> 2003. <i>J. Exp. Med.</i> 198:1829
Gene ID	225825

Product Data

C57BL/6 mouse splenocytes were stained with CD8a APC and biotinylated CD226 (clone 10E5) (top) or biotinylated rat IgG2b, κ isotype control (bottom), followed by Streptavidin PE.
