

APC anti-human CD14 Antibody

Catalog# / Size	367117 / 25 tests 367118 / 100 tests
Clone	63D3
Regulatory Status	RUO
Other Names	Monocyte differentiation antigen CD14, myeloid cell-specific leucine-rich glycoprotein, LPS receptor
Isotype	Mouse IgG1, κ
Description	CD14 is a 53-55 kD glycosylphosphatidylinositol (GPI)-linked membrane glycoprotein that is also known as the LPS receptor. CD14 is expressed at high levels on monocytes and macrophages, and at lower levels on granulocytes. Some dendritic cell populations such as interfollicular dendritic cells, reticular dendritic cells, and Langerhans cells have also been reported to express CD14. As a high-affinity receptor for LPS, CD14 is involved in the clearance of gram-negative pathogens and in the upregulation of adhesion molecules and cytokine expression in monocytes and neutrophils.

Product Details

Verified Reactivity	Human
Antibody Type	Monoclonal
Host Species	Mouse
Immunogen	Purified human peripheral blood monocytes.
Formulation	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and BSA (origin USA)
Preparation	The antibody was purified by affinity chromatography and conjugated with APC under optimal conditions.
Concentration	Lot-specific (to obtain lot-specific concentration, please enter the lot number in our Concentration and Expiration Lookup or Certificate of Analysis online tools.)
Storage & Handling	The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.
Application	FC - Quality tested
Recommended Usage	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis . For flow cytometric staining, the suggested use of this reagent is 5 μ l per million cells in 100 μ l staining volume or 5 μ l per 100 μ l of whole blood.
Excitation Laser	Red Laser (633 nm)

Antigen Details

Structure	GPI-linked membrane glycoprotein.
Distribution	Monocytes, macrophages, dendritic cells, and granulocytes.
Function	LPS receptor, clearance of Gram-negative pathogens.
Interaction	LPS.
Ligand/Receptor	LPS.
Cell Type	Dendritic cells, Granulocytes, Macrophages, Monocytes, Neutrophils
Biology Area	Cell Biology, Immunology, Neuroinflammation, Neuroscience
Molecular Family	Adhesion Molecules, CD Molecules
Antigen References	<ol style="list-style-type: none"> 1. Stocks SC, <i>et al.</i> 1990. <i>Biochem. J</i>. 268:275. 2. Wright SD, <i>et al.</i> 1990. <i>Science</i> 4975:1431.

Product Data

Human peripheral blood monocytes were stained with APC anti-human CD14 (clone 63D3) (filled histogram) or APC mouse IgG1, κ isotype control (open histogram).
