

## Purified anti-human CD257 (BAFF, BLYS) Antibody

<b>Catalog# / Size</b>	366502 / 100 µg
<b>Clone</b>	1D6
<b>Regulatory Status</b>	RUO
<b>Workshop</b>	HCDM listed
<b>Other Names</b>	BAFF, BLYS, TNFSF13b, B cell activating factor, tumor necrosis factor ligand superfamily 13B, B lymphocyte stimulator (BLYS), TNF and APOL-related leukocyte expressed ligand 1 (TALL1), TNF homolog that activates apoptosis, NF-κB and JNK (THANK)
<b>Isotype</b>	Mouse IgG1, κ
<b>Description</b>	BAFF, also known as B cell activating factor, tumor necrosis factor ligand superfamily 13B, B lymphocyte stimulator (BLYS), TNF and APOL-related leukocyte expressed ligand 1 (TALL1), and TNF homolog, activates apoptosis, NF-κB, and JNK (THANK). BAFF is a type II transmembrane protein and is a member of the tumor necrosis factor ligand superfamily. BAFF can be proteolytically cleaved to form a soluble protein. BAFF, like other TNF ligand family members, forms homotrimers. The predicted molecular weight of a BAFF monomer is approximately 31 kD. BAFF is expressed on peripheral blood B and T lymphocytes, monocytes, macrophages, and dendritic cells. It is upregulated by IFN-γ and downregulated by PMA/ionomycin treatment.

### Product Details

---

<b>Verified Reactivity</b>	Human
<b>Antibody Type</b>	Monoclonal
<b>Host Species</b>	Mouse
<b>Immunogen</b>	Human CD257 transfected murine cell line.
<b>Formulation</b>	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
<b>Preparation</b>	The antibody was purified by affinity chromatography.
<b>Concentration</b>	0.5 mg/ml
<b>Storage &amp; Handling</b>	The antibody solution should be stored undiluted between 2°C and 8°C.
<b>Application</b>	<a href="#">FC - Quality tested</a> <a href="#">IHC-P - Reported in the literature. not verified in house</a>
<b>Recommended Usage</b>	Each lot of this antibody is quality control tested by <a href="#">immunofluorescent staining with flow cytometric analysis</a> . For flow cytometric staining, the suggested use of this reagent is ≤0.125 µg per million cells in 100 µl volume. It is recommended that the reagent be titrated for optimal performance for each application.

<b>RRID</b>	AB_2565484 (BioLegend Cat. No. 366502)

### Antigen Details

---

<b>Structure</b>	Type II transmembrane protein and is a member of the tumor necrosis factor ligand superfamily. It
------------------	---

can be proteolytically cleaved to form a soluble protein and it forms homotrimers. The predicted molecular weight of monomer is approximately 31 kD.

<b>Distribution</b>	Peripheral blood B and T lymphocytes, monocytes, macrophages, and dendritic cells. Upregulated by IFN- $\gamma$ and is downregulated by PMA/ionomycin treatment.
<b>Function</b>	Stimulates B and T cell immunity, regulates humoral immunity by binding TACI and BCMA receptors, and prevents apoptosis and promotes B cell survival by binding the BAFF-specific receptor (BAFFR/BR3).
<b>Ligand/Receptor</b>	BAFF binds to TACI (TNFRSF13B) and BCMA (TNFRSF17) as well as the APRIL ligand. BAFF also binds to the BAFF-specific receptor (BAFFR/BR3).
<b>Cell Type</b>	B cells, Dendritic cells, Macrophages, Monocytes, T cells
<b>Biology Area</b>	Cell Biology, Costimulatory Molecules, Immunology, Signal Transduction, Stem Cells
<b>Molecular Family</b>	CD Molecules, Cytokines/Chemokines, Growth Factors, Soluble Receptors

## Other Formats

Purified anti-human CD257 (BAFF, BLYS), Biotin anti-human CD257 (BAFF, BLYS), PE anti-human CD257 (BAFF, BLYS), APC anti-human CD257 (BAFF, BLYS), APC/Cyanine7 anti-human CD257 (BAFF, BLYS), TotalSeq™-C0863 anti-human CD257 (BAFF, BLYS)

## Product Data

Human CD257-transfected bovine coronary artery endothelial cell line (B300) was stained with purified anti-human CD257 (clone 1D6) (filled histogram) or purified mouse IgG1,  $\kappa$  isotype control (open histogram), and was then followed by anti-mouse IgG PE.
