

## FITC anti-human CD206 (MMR) Antibody

<b>Catalog# / Size</b>	321103 / 25 tests 321104 / 100 tests
<b>Clone</b>	15-2
<b>Regulatory Status</b>	RUO
<b>Other Names</b>	MMR (macrophage mannose receptor), MR (mannose receptor), CD206, MRC1
<b>Isotype</b>	Mouse IgG1, $\kappa$
<b>Description</b>	Macrophage mannose receptor (MMR) is a 162-175 kD type I membrane protein also known as CD206, MRC1, or mannose receptor (MR). It is a pattern recognition receptor (PRR) that belongs to C-type lectin superfamily. MMR is expressed on macrophages, dendritic cells, and hepatic or lymphatic endothelial cells, but not on monocytes. MMR recognizes a range of microbial carbohydrates bearing mannose, fucose, or N-acetyl glucosamine. MMR mediates endocytosis and phagocytosis, induces activation of macrophages and antigen presentation, plays an important role in host defense, and provides a link between innate and adaptive immunity.

### Product Details

---

<b>Verified Reactivity</b>	Human
<b>Antibody Type</b>	Monoclonal
<b>Host Species</b>	Mouse
<b>Immunogen</b>	Purified human mannose receptor
<b>Formulation</b>	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and BSA (origin USA)
<b>Preparation</b>	The antibody was purified by affinity chromatography, and conjugated with FITC under optimal conditions.
<b>Concentration</b>	Lot-specific (to obtain lot-specific concentration, please enter the lot number in our <a href="#">Concentration and Expiration Lookup</a> or <a href="#">Certificate of Analysis</a> online tools.)
<b>Storage &amp; Handling</b>	The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. <b>Do not freeze.</b>
<b>Application</b>	<a href="#">FC - Quality tested</a>
<b>Recommended Usage</b>	Each lot of this antibody is quality control tested by <a href="#">immunofluorescent staining with flow cytometric analysis</a> . For flow cytometric staining, the suggested use of this reagent is 5 $\mu$ l per million cells in 100 $\mu$ l staining volume or 5 $\mu$ l per 100 $\mu$ l of whole blood.
<b>Excitation Laser</b>	Blue Laser (488 nm)
<b>Application Notes</b>	The 15-2 antibody blocks the interaction of MMR with its ligand, and inhibits mannose receptor-mediated degradation of t-PA by macrophages. Additional reported applications of this antibody (for the relevant formats) include: Western blotting <sup>1</sup> , blocking of ligand binding <sup>1,2</sup> , immunofluorescence <sup>3</sup> , and immunohistochemical staining of acetone-fixed frozen tissue sections <sup>1</sup> . The Ultra-LEAF™ purified antibody (Endotoxin < 0.01 EU/ $\mu$ g, Azide-Free, 0.2 $\mu$ m filtered) is recommended for functional assays (Cat. No. 321149 and 321150).

## Antigen Details

---

<b>Structure</b>	Type I membrane protein, Pattern Recognition Receptor (PRR) family, C-type lectin superfamily, 162-175 kD
<b>Distribution</b>	Macrophages, dendritic cells, hepatic and lymphatic endothelial cells
<b>Function</b>	Pathogen binding, facilitate phagocytosis and endocytosis, macrophage activation and antigen presentation
<b>Ligand/Receptor</b>	Mannose, fucose, N-acetyl glucosamine
<b>Cell Type</b>	Dendritic cells, Endothelial cells, Macrophages
<b>Biology Area</b>	Cell Biology, Immunology, Neuroscience, Neuroscience Cell Markers
<b>Molecular Family</b>	CD Molecules
<b>Antigen References</b>	<ol style="list-style-type: none"> <li>1. Mason D, <i>et al.</i> Eds. 2002. <i>Leukocyte Typing VII.</i> Oxford University Press. p303</li> <li>2.
